

CRÉATION BAUMANN | HEALTH CARE

LIVING SPACE ENCOURAGING RECOVERY

Humboldtlinikum, Berlin, Germany,
Vivantes Netzwerk für Gesundheit GmbH

Production year: 2006

Architect
Atelier Gebel, Berlin

Initial situation
First-rate medical and nursing services are provided in the interdisciplinary ward of the Humboldt Clinic. In addition to extensive facilities and other complementary services, a pleasant interior decoration was to help support the convalescence of the patients.

Solution
Scumble applications on wooden decorative panels, translucent textile panels with digital prints and backlit motive walls convey the impression of warmth and remind you of dunes and the calming roar of the surf. Dimmer, as a colour-coordinated curtain and aptly named, discreetly ensures a pleasant atmosphere for the patients.

Product
Dimmer, Sinfonia CS
