

CRÉATION BAUMANN | EDUCATION / CULTURE

DIFFERENTIATED COLOR CONCEPT

Werksschule, Gempfen, Switzerland

Architect:

AtelierG36 Architektur GmbH, Basel, Switzerland in cooperation with the artist, Ulrich Muchenberger, Basel, Switzerland

Initial situation:

Sonnhalde Gempfen is a public institution for persons with a disability, in particular persons suffering from autism or similar behavioral disorders.

Color choice and acoustics are essential in view of ensuring our well-being. Colors have a particularly pronounced influence on the mood of autistic people.

Solution:

In the classrooms, every window was equipped with three curtain rails for curtains in yellow, red, and blue, thus creating a differentiated color concept. Teachers can now react to the students' moods by changing the colors. In addition to this, sound insulation was ensured by installing acoustic fabrics in the large hall.

Product:

Sinfonia CS IV, Dimmer II, Sonor Color
