

Densely aluminium-metalized fabric in neutral shades, with a light transmission index of 3 - 35%. The white color 151 has no aluminium coated back and therefore possesses no light reflection values. A specially devised new finish gives this well established item greater stain resistance to water and water vapours as well as other soiling.

PROPERTIES

Article	PROTECT III
Article No.	0004365
Collection	Silver&Steel
Number of colours	4
Material	100% PLF CS
Flame-retardant properties	Certificate on request
Width	210 cm / 83 Inches
Weight	180 g/m ²
Use	Curtains/Sheers Panels Roman blinds Acoustical fabrics
Care	
Dry cleaning (length shrinkage) approx. %	1%
Segments	Office Education / Culture / Museum Health Care Hospitality
Functions	Privacy and glare protection Flame-retardant properties Acoustics
Measured data	Light transmission Sound absorption Airflow resistance Files online available.
Special notes	- By using as panel curtain: - Max. width of panel approx. 120 cm - Max. height of panel approx. 300 cm
