A feeling of being at home

Textiles from Création Baumann for hoteliers

Textiles in restaurants, bars or hotels must fulfil a multitude of functions, whilst generating a welcoming comfortable atmosphere; to promote the wellbeing of guests and reflect the identity of the establishment. Création Baumann offers a broad range of curtain and upholstery fabrics with a huge number of colours and materials, but also with special properties for functions such as black out or sound absorption.

The Hospitality Collection is specially tailored to the demands of the contract sector and encompasses flame retardant, enduring and above all easy care textiles. In 2012, the textiles are enriched with six new products. With “Mystery” Création Baumann presents a high quality black out fabric. A refined mélange texture on the facing side and a soft feel give the curtain fabric a natural, serene note. “Mystery” is available in 19 colours and can be combined with the transparent fabric of “Sprint” to great advantage. “Henry” is masculine and elegant with light irregular linear striping. The timeless upholstery fabric in Trevira CS is extremely hard wearing and resistant to staining – and can also be used as a heavy curtain fabric. The available ten colour settings are kept neutral.

Aesthetically the designs are harmonised with the hoteliers sector. The textiles must blend into numerous environments and do justice to diverse furnishing styles. Whilst they may draw admiring glances, they must maintain the harmony of the setting. For the new jacquards the design team from Création

Baumann therefore has reinterpreted classic, textile patterns afresh and given them a modern, young signature. “Marva” depicts a flowing wave design, which is given special impact by a mat shine effect that brings it to life. “Gala” forms an abstract, floral net, whilst “Selva” reproduces fragments of a meadow that looks as if it had been painted in broad brush strokes. The three decor fabrics can be used on both sides; respectively they are available in ten, eleven and seven different colour settings.

With the Hospitality Collection, but also with a whole series of renowned references, such as the Hotel de Paris in Monte Carlo or the Aparthotel in Rotkreuz, Création Baumann shows itself to be an exceptionally competent partner to the hotel industry. The new products are available from specialist outlets from January 2012.
