

GECKO IN THE BOX | ADHESIVE TEXTILES

GECKOS for the winter season

Création Baumann launches three new GECKO IN THE BOX assortments for the most beautiful season of the year. The X-MAS editions feature winter motifs with style and refinement. Majestic ice crystals, large and diminutive Christmas stars and baubles impart enchantment and contentment with festive winter scenes at the window; enticing to day dreams.

The pre-cut components of the self adhering textile can be used to provide privacy and glare protection or as a decorative element. Thanks to a special coating on the reverse they can be affixed and removed to sheet and plate glass, over and over again without loss of their adhesive power. The GECKO IN THE BOX X-MAS editions are offered in refined festive presentation boxes, along with other editions with enchanting and delightful motifs. Christmas editions will be available from specialist outlets from October 2012 onwards.
