With lounge furniture for the outdoors the living room is transported to the garden, the patio or the balcony. The choice ranges from simple padded seats to an outdoor chaise longue as well as cushions and poufs. But it is only with suitable cover and upholstery fabrics that living in the open air becomes pleasurable. Création Baumann is presenting its fully enlarged "Outdoor" Collection in 2017. The existing uni collection has been broadened with eight new fabrics in different designs. Classic check, elegant stripes, multi-coloured strié designs and dainty dots encounter floral designs and slightly three-dimensional jacquards. All fabrics can be combined with each other and with the unis from the established collection. The colour palette encompasses neutral hues, bright accent colours such as mint and coral, and elegant dark tones such as midnight blue and strawberry. This allows for the creation of very different outdoor themes – from the chalet to the swimming pool.

The fabrics are made from 80% polyester / 20% polypropylene respectively are 100% acrylic, hardwearing and easy care, water repellent and resistant to soiling from stains and mould as well as discolorations from chlorine and saltwater and exhibits optimal light- and UV-fastness.
