Enchanting rose windows

In the 2019 Collection Création Baumann presents the elegant “Rosetta” fabric

Different sized rose window after rose window line up to great effect in the extravaganza “Rosetta” at the window. The unusual curtain fabric from Création Baumann’s “Nature & Poems” Collection combines linen with beautifully soft wool yarns into a three-dimensional look.

Window rose upon window rose aligns on the softly draping fabric with occasional graphic links to generate a cohesive pattern. “We took inspiration from traditional rosettes as well as graphic grid patterns”, says Sibylle Aeberhard, the designer. “Rosetta”, the extravaganza from the newly launched “Nature & Poems” Collection, stands out. It is the Collection’s most elegant item”, says Sibylle Aeberhard.

The highly decorative fabric comes to life through its three-dimensional effect derived from combining Mohair and wool with linen. The textile experts from the Swiss Langenthal based company interweave a linen warp with a wool weft. Imperfections are deliberate: “It establishes a link to hand crafted items”, explains Sibylle Aeberhard.

In addition to the black/white option, the fabric is also available in extravagant colour settings such as rust red on the palest of blue, a vibrant yellow green on a silver-grey, a delicate pink and muted greys. It is versatile and depending on colour setting it fits into entirely different settings – from lofty city pads to modern glass constructions.
