

GECKO | GECKO IN THE BOX | ADHESIVE TEXTILES

Beautiful vistas with GECKO

GECKO conjures colourful and bright images in front of the window in any season, even when it is cold and grey outside! Following the successful introduction of GECKO IN THE BOX KIDS, the Création Baumann's design team has ventured out to a younger and more playful look for the new motifs of the innovative adhesive textile.

The new GECKO IN THE BOX BOTANICA generates poetic silhouettes with delicate blooms and foliage. BUBBLES is setting fresh colour accents at the window with a multitude of colourful circles in differing sizes and textures, whilst the elliptical shapes of SPLENDO can be used to create the most diverse floral and graphic patterns. Because the silicon coating allows the adhesive textile to be fixed to, and removed from glass surfaces without loss of adhesive power, individual components can repeatedly be rearranged into new formations.

Floral motifs were also the design team's inspiration for the new GECKO products. The flower sketches of GECKO XENA look as if they had been drawn by hand. They are printed in white, black, pink or a vivid green on GECKO Crypta. MALVA displays a classic flower print on a Crypta base in five different colours. With TORNA Création Baumann GECKO is introducing a new texture. Individually turned threads of varying strength generate an interesting surface, which comes to life with incoming light and sun rays.

The new products of GECKO IN THE BOX and the new GECKO designs are available from specialist outlets from autumn 2011.
