THE NEED FOR TRANQUILLITY

A tailor-made open office solution that lends a homely touch as a room divider in office premises and provides tranquillity with its sound-absorbing function.

SITUATION

Today, interior designers are often faced with problems related to the room acoustics in open offices. daskonzept will present innovative concepts for interior design at the BEA Co-Living trade show.

SOLUTION

The semi-transparent PRINTACOUSTIC curtain fabric lends a homely touch with its aesthetic design and provides tranquillity in often hectic office situations with its sound-absorbing function. Hanging the fabric in open areas can quickly and simply create a separate room and invites trade show visitors to move around freely therein.
