

REFERENCES / OFFICE / ACOUSTICS / FLAME-RETARDANT

TECHNICALLY PLAYFUL

This interior design contradicts the prejudice that information technology is a boring, monotonous business; it provides fresh inspiration and motivation every day, to customers as well as staff.

Object

F-Secure Oyj, Helsinki, Finland

Concept

Pöyry Architects, Helsinki, Finland

INITIAL SITUATION

The interior decoration is bright and playful, but still as technical as the subject matter itself. This interior design contradicts the prejudice that information technology is a boring, monotonous business; it provides fresh inspiration and motivation every day, to customers as well as staff.

SOLUTION

Vertical blind systems (Metric III) have proved to be the right design element from the point of view of style as well as technology. The blinds are used in a completely new way, also acting as room dividers. They create rooms within rooms; occupants can pass through them easily, and they can be removed as necessary. Their colourful, fresh styling injects energy, while their technical playfulness inspires new ideas.

USED PRODUCTS

TECHNICALLY PLAYFUL

SPECTRA IV

ART.-NO. 0010580

Use:	Vertical blinds
Number of colorits:	31
Material:	100% Flameretardant polyester (Trevira CS)
Fabric width:	12.7 cm
Weight:	45 g/m
Sound absorption:	Alpha value 0.50
