## MODERN AND SIMPLE

A uniform interior shading solution for all flats in the listed building in Trafalgar Square.

### **Object**

Hobhouse Court, London, England

### **Concept**

Brisac Gonzalez, London, England |  
Arquitectonica, TP Bennett, London,  
England

### **STARTING POINT**

The two architectural firms have transformed the listed building in Trafalgar Square to house 19 luxury flats, an art gallery and office and retail space. The architectural firm Brisac Gonzalez turned to Création Baumann for a modern and simple interior shading solution that could be used in all the flats, ensuring continuity throughout.

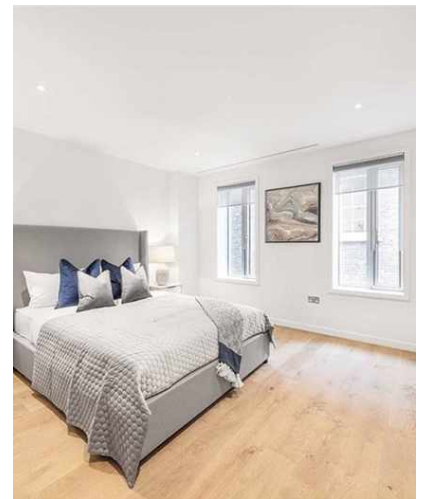

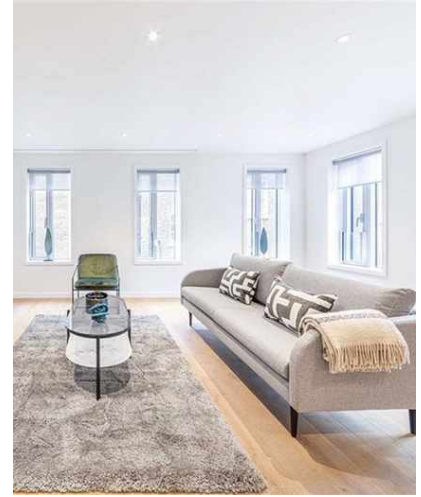

### **SOLUTION**

According to the architects, Création Baumann has the best roller blind fabrics to find a transparent and blackout roller blind variant for every window. The transparent, linen-like fabric Sonor II R is combined with the structured blackout roller blind Denso R in modern shades of grey and white. The Ecotric Plus I roller blind system with smooth, ultra-quiet and wireless control was the ultimate technology solution for the flats.
