ALPINE PEAKS

A classic linen fabric determines the atmosphere in the living room and proves to be a perfect fit with the other natural materials.

Object

Holiday home, Upper Valais, Switzerland

Concept

Tschan InnenArchitektur, Möriken, Switzerland

INITIAL SITUATION

The architectural and design weaknesses of an unfinished building, i.e. small windows and skew floor plans, were to be compensated with a high quality finishings.

SOLUTION

The mood in the room was to be achieved with a small number of carefully combined materials and surfaces expressing the character of the Alpine world. A classic linen fabric determines the atmosphere in the living room and proves to be a perfect fit with the other natural materials. A simple, semi-transparent, plain colored fabric was chosen for the roller blinds in the living- and bathrooms.
