## LUXURIOUS LIGHTNESS

### Object

Irabu Island S Residence / i love 385,  
Irabuirabu, Japan

### Concept

SAKAKURA ASSOCIATES, Takenosuke  
Sakakura+Shu Kitayama+Liye, Tokyo,  
Japan

### Photos

Tololo studio, Hiroshi Tanigawa, Tokyo

### STARTING POINT

The living space gives way to the infinity pool and is a transparent open room supported only by walls made from Ryukyu limestone. On the ocean front, the living area is partitioned off by a solid 30m glass window, providing an unobstructed view of the sea. <https://ilove385.co.jp/>

### SOLUTION

To protect from prying eyes, in particular around the back window, the client sought a privacy shield without losing the original feeling of openness. Blinds help to recreate the lost privacy while retaining the architecture's lightness. The semi-transparent fabric with a natural texture that was chosen for the blinds perfectly goes with the holiday home's luxurious ambience.
