

REFERENCES / OFFICE / ACOUSTICS / DIMMING / FLAME-RETARDANT

FORM AND FUNCTION

The sensitive renovation of the central library in Zurich brings the old together with the new. A modular furnishing system is especially oriented towards the students.

Object

Kabelwerk Brugg AG, Brugg, Switzerland

Concept

Tschudin & Urech AG, Brugg / Witzig,
Baden / Gerriets GmbH, Umkirch / Imhof
Akustik AG, Speicher

INITIAL SITUATION

The training, lecture and multi-purpose room at the Flex building has to cope with the most flexible possible usage. As well as fulfilling acoustic requirements, the curtains also have to divide the room and create an atmosphere.

SOLUTION

Effective noise absorption and appealing aesthetics in perfect harmony, thanks to the multi-talented SONIC. All the curtains are motorised. The green curtains are doubled so that they provide optimum acoustic separation as well as acting as room dividers. The light green curtain tracks also provide further shading towards the inner courtyard.
