A NEW PLACE FOR ART

A 3-story monolith reflects the place's industrial character, offering new exhibition space for modern art.

Object

MCBA, Kantonales Museum für bildende Kunst, Lausanne, Schweiz

Concept

Barozzi Veiga, Barcelona

Photos

Duccio Malagamba Fotografia de Arquitectura, Barcelona / Simon Menges, Berlin

STARTING POINT

On the side of the railway, the museum has a closed facade with hardly any windows to protect the displays from natural light. The building's north side is more open.

SOLUTION

The high and bright foyer has semi-sheer curtains for glare protection to regulate the light. The blackout fabrics with their high level of sound absorption ensure pleasant room acoustics in the auditorium.
