HOUSE OF COLOUR

Object

Private home, Bad-Homburg, Germany

Concept

Dipl.-Ing. Lore Wolfertz Architectural Practice, Bad-Homburg / Interior Coach, Brigitte Peter, Frankfurt

INITIAL SITUATION

Textiles were used to improve the room acoustic and to provide colourful accents, matching the strong tones of the façade.

SOLUTION

A high level of shading can be achieved by the flexible overlay of twin-colour panels in the dining area. The three Cavallo panels in the living room are also used to darken the room so that images can be projected onto a screen and viewed at any time of day. Gecko was used as a playful screen to provide privacy in the bathrooms, and the curtain in the bedroom is quite consciously hung on separate tracks so that the wonderful view can be enjoyed from all directions.

USED PRODUCTS

HOUSE OF COLOUR

GECKO IN THE BOX - CUBICO

ART.-NO. 0153155

Use: Gecko in the box
Number of colorits: 1
Material: 29% Polyester / 71% Silicone
Weight: 0 g/m²

GECKO LASER QUADRO

ART.-NO. 0099850

Use: Gecko
Number of colorits: 1
Material:

JASPIS II

ART.-NO. 0036670

Use: Transparent curtain fabric
Number of colorits: 43
Material: 100% Flameretardant polyester (Trevira CS)
Fabric width: 320 cm
Weight: 54 g/m²
