VITRA WORKSPACE

"Workspace" provides a comprehensive overview of Vitra furniture for offices and public spaces. It is also used as a dynamic planning and learning tool in certain environments.

STARTING POINT

The newly renovated room is used as a platform for a number of different product categories and leaves space for installations. Each of these categories—product launches, office systems, "Meet & Retreat", office seating, standards and lights—with their own contemporary installation welcomes reflection. Guests and staff alike can use these areas as an informal workspace.

SOLUTION

Two curtains can be used to partition the large meeting table. Sinfonia CS V creates an airy separation from the open space, while Phantom Plus is opaque, blacks out and has distinct acoustic properties. The Spectra vertical blind, whose special manufacture in the lower section results in a very even look, almost creates a separating wall.
