

REFERENCES / HEALTH CARE / ACOUSTICS / FLAME-RETARDANT

THE HEART OF PAEDIATRIC MEDICINE

A reduced colour scheme in the sense of a "youthful lightness and freshness" is implemented throughout.

STARTING POINT

Conception of a new paediatric clinic in close proximity to the existing hospital structures. The façades are defined by circumferential strip windows that span the structure.

SOLUTION

Inside, the challenge was to pair the child-friendly atmospheres with the functional efficiency of modern and advanced health care. The choice of materials and colour scheme are consistent, minimalist, and convey the feeling of "youthful lightness and freshness".

USED PRODUCTS

THE HEART OF PAEDIATRIC MEDICINE

SINFONIA CS VI ART.-NO. 0100301.0000
COL
1012/1013/1051

Use: Transparent/semi-transparent curtain fabric
Number of colorits: 3
Material: 100% Flame retardant (Trevira CS)
Fabric width: 300 cm
Weight: 74
Sound absorption: Alpha value 0.10
