LIGHT ON, NOISE OFF

Transparent acoustic fabric from Création Baumann

Object

punkt6 – House of Materials, Thun, Switzerland

Concept

Strasser AG Thun / strasserthun, Thun | Studio strasserthun, Zurich retailer: roomdresser gmbh, Zurich

Photos

René Dürr Architekturfotografie, Zürich

STARTING POINT

With „punkt6“, the strasserthun material pioneers have created a world where planners and designers can experience innovative materials and finishings up close - in an atmosphere that is refreshingly different from traditional showrooms: The architecture is completely focused on providing a backdrop for the pure display of the materials.

SOLUTION

Light control and noise absorption are the central challenges in the 750 m2 exhibition and office space. The transparent acoustic fabric BETACOUSTIC enables these challenges to be mastered with brilliance. Its sophisticated elegance and excellent functionality - with an Alpha value of 0.65 - contributes to the space concept.
